

# A GUIDE TO MAKIN' A 16 PAGE QUARTER-SIZE ZINE!

**STEP 1:** Print out both pages, front and back.

**STEP 2:** Cut each page in half through the horizontal center (hamburger style, along the red line) so that each strip has two zine pages on the front and two on the back. If you have a page on bottom and one on top you goofed.

**STEP 3:** Fold each strip of pages in half; making sure left side goes under the right. If you did this part right you should have four tiny greeting cards!

**STEP 4:** Insert the tiny greeting cards into one another until you have a booklet. Double check your page order using the guide below, and if you haven't borked it you can put a couple staples in the spine.
